## CONDITIONS

---

These extreme treks are physically demanding, it is imperative that whatever the age of participants, they be in good health, self-reliant, and of flexible attitude. The Arctic is both undependable and unforgiving. Trying to force things to happen in order to maintain a pre-set schedule will accomplish nothing, but will only create frustrations for everyone. These are the conditions of Arctic travel, past as well as present. In this regard, the preceding itinerary is intended as a general guide. The departure dates could change, variables beyond our control, such as the weather or sea ice conditions, could force modification of the itinerary, including the elimination of planned trip elements. The day we travel to Akulivik will be chosen based on a high probability for success. On these days, your guides will make sure you travel safely, however, they will not take unnecessary risks; in the event of a failed attempt, no refunds are possible. Accordingly, if the ability to kickback and be patient is alien to your philosophy, it is suggested that participation would be a mistake; delays are inevitable.

Price is inclusive, per person, double occupancy, and based on 2 paying participants. Single supplements are not normally available in the Arctic; however, single participants are not required to pay a surcharge. Price is subject to change as conditioned by such variables as the number of participants, fuel costs, and a surcharge of \$550 cdn to partially cover the cost of additional nights that may be spent at the Nunavik's Hotel in excess of the five nights provided for in this itinerary. (In the 8 years that we have made these geographic packages, there have been few instances where one additional night was required.)

The additional cost is necessary due to the extremely high costs associated with such remote accommodations. The alternative to these charges is to arbitrarily increase the cost of the basic trip to provide for such potential contingencies.

**The cost of this package is based on 2 customers.**

## BAGGAGE ALLOWANCES

---

Travel north with Air Inuit from Montreal to any Nunavik village

- o Maximum 36 kg plus one carry on

Travel south with Air Inuit from any Nunavik Village
